MEDIA RELEASE

Employment4students is proud to announce it's partnership with Infomat - The Education and Entertainment Network.

Employment4students (E4S) is proud to announce it's partnership with Infomat, the online service providing free educational resources to students, teachers and parents via its website, www.infomat.net. E4S helps school and university students find term time and holiday jobs via their online service, www.e4s.co.uk.

This new partnership allows E4S to benefit Infomat students by offering access to their term time and holiday jobs, as well as their wealth of job hunting advice and guidance.

Chris Eccles, Director of E4S comments, "E4S wholeheartedly endorses Infomat's model of providing free information and resources to students, and we look forward to using our expertise and advice to help students find suitable work opportunities throughout the UK."

The partnership, which will run over twelve months, is expected to benefit thousands of school, college and university students.

Chris continues, "This partnership underlines our on-going commitment to helping students develop their skills, try their hand in a variety of jobs and make ends meet in this period of rising prices."

Employment 4 Students

E4S was setup in 2000 by two university students using their first year student loan, in the wake of the introduction of tuition fees and abolition of student grants. The Company is owned by three ex-Royal Grammar School boys and a fellow university student and the E4S website now attracts more than 200,000 visitors each month.

www.e4s.co.uk helps undergraduate university students, school and college students find part-time term-time jobs, part-time and temporary holiday jobs, gap year jobs in the UK and abroad, internships, and graduate entry jobs, as well as helping them save money on their purchases via 'Deal Zone'. Those recruiters looking to fill part-time temporary, seasonal, intern and graduate entry level positions have the facility to advertise job vacancies to these students either on a national or targeted regional basis.
